**The air around us**

Do you ever think much about the air around us?

Although we can't see it, we know that it is there.

We can feel the wind blowing it around, we can see the way that it makes the branches of the trees move backwards and forwards.

Sometimes, if the wind is very strong it will blow us along...or stop us from going in the direction we want to.

The air does lots of other things as well – it keeps aeroplanes flying safely in the skies and it can also hold some things up. Some musical instruments, such as recorders or flutes, work by air being blown through them.

Our activities today will all focus on these things and we hope that you will have fun experimenting with them.

However, the most important thing about the air is that it keeps us alive.

We believe that God's Holy Spirit is like the air – we can't see it, but we can see the effect that it has on people and the world around us.

If we let it, the Holy Spirit can guide us in the right direction – or warn us if we are going the wrong way. It can also help us and support us when we are running into difficulties.

But, just as the air that we breath keeps us alive, so we believe that God's Holy Spirit can keep us spiritually alive and healthy so that we can appreciate all the good things that he has given us, know that he is always there to help us and assure us that he will never leave us.

## **Today's activities**

- Floating Ball
- Paper Aeroplanes
- Blow painting
- Windmills
- Pan Pipes
- Fans
- Balloon Helicopters

## **Plus**

See what happens when we suck the air out of jar containing a marshmallow, put a glass over a lit candle in water or blow air over a ping pong ball.

AND....

Don't forget to make your own Pizza if you would like to
