# Folded Paper Fan - An Easy Paper Craft

**Step #1:**

Decorate your piece of paper in your desired design. For this you can use a pencil to draw it out and color them in with crayons, pencil crayons or markers.

Step #2:

Start at one end of the paper. Fold a one inch crease, and follow that by another one inch crease in the opposite direction. Repeat this until the entire paper is folded.

Step #3:

Take one end of the folded paper and pinch it together. This will leave the other end open. Just fan out this end.

Finish off by wrapping tape round the pinched end.
